

OQ Chemicals Donates 10,000 Euros to Support Flood Victims

Monheim am Rhein, Germany, July 22, 2021 – The recent flood disaster has left behind immense damage and previously unimaginable destruction in the German states of North Rhine-Westphalia and Rhineland-Palatinate.

OQ Chemicals would like to support those affected in the flood regions quickly and unbureaucratically and is donating 10,000 euros to the German relief coalition "Aktion Deutschland Hilft" for this purpose. The company is currently supporting its employees who are providing assistance as volunteers with donations in kind.

"Fortunately, no OQ Chemicals employees were harmed in the disaster. The buildings and production facilities at our German sites in Monheim am Rhein, Marl, and Oberhausen have not been affected by the flood. This gives us all the more reason to support the people in the flood region in solidarity. We feel for them and want to do our part to help those who have lost their homes or even had their livelihoods threatened by the flood and its aftermath," said Dr. Oliver Borgmeier, Managing Director and COO of OQ Chemicals. "The relief coalition, to which we have donated, brings together renowned German aid organizations such as Johanniter, Malteser, and ASB. They can provide coordinated assistance after major disasters. We pay our respect to their tireless efforts for the affected people and are confident that our donation will be in good hands there," he continued.

About OQ Chemicals

OQ Chemicals (formerly Oxea) is a global manufacturer of oxo intermediates and oxo derivatives, such as alcohols, polyols, carboxylic acids, specialty esters, and amines. These products are used for the production of high-quality coatings, lubricants, cosmetics and pharmaceutical products, flavours and fragrances, printing inks and plastics. OQ Chemicals employs more than 1,400 people worldwide and is part of OQ, an integrated energy company with roots in Oman. OQ emerged in 2019 upon the successful integration of nine legacy companies. Operating in 13 countries, OQ covers the entire value chain in the hydrocarbon sector from exploration and production through to marketing and distribution of its products. OQ sells its fuels and chemicals in over 60 countries worldwide. For more information about OQ Chemicals, visit chemicals.oq.com.
